

For the first time since the inception of our distance education program, we have been able to spend more time on student contact than on managing the LMS system. With CampusLearning, the teachers have reported that the software cuts their work time in half. The students also feel like they can better control their learning environment.

*Cathy Snoddy, PhD,
Director of Applications,
Huntington Junior College,
June 2007*

A.T. Still University has been watching developments in the open-source LMS area for the past few years. The integration between Moodle and CampusVue creates more value in both the academic and administrative systems. It helps pave the way for utilizing open-source and proprietary systems together to create a more unified student experience.

*Bryan Krusniak, Director of IT,
ATSU, August 2007*

WHY MOODLE, WHY NOW?

For better outcomes, Campus Management unites administrative systems and open-source e-learning software

Distance learning has become mission-critical to most institutions. Now, with the rise of fully-featured open-source course management applications like Moodle, solid e-learning technology is universally available. However, according to the Sloan Consortium's 2006 report on online education, "Making the Grade," deans still face two major barriers: ensuring that students persist in their courses and helping faculty to efficiently use the platform.

Unique features within Campus Management's student system address student persistency. In addition, students and faculty benefit from real-time data exchanges of courses, rosters, drop/adds and more. The unified systems also monitor attendance and participation—sending auto-alerts to students, faculty and advisors through a variety of online, text and email channels. Other features include automated re-enrollment and grade posting, relieving staff and instructors of menial data entry tasks, while enhancing communications with all stakeholders.

CampusLearning's other services include platform conversion from commercial LMS applications, 24/7 help desk and academic consulting and training.

MOODLE ADOPTION WORLDWIDE

THE ULTIMATE E-LEARNING EXPERIENCE

CampusLearning is enterprise-level services and support for Moodle, an open source course management system designed by educators—and the most widely used learning system of its kind.

Create and deliver high quality courses. Enable instructors to produce courses without intensive support from IT. Ensure uptime and continuity with hosting and managed services at a world class hosting center.

CampusLearning includes all the key features you expect from an enterprise learning management platform:

- Customizable look and feel
- Full suite of teaching and learning tools
- Synchronous and asynchronous delivery
- Easy to use course building tools for instructors
- Course content management
- Consistent, easy to navigate pages
- Customizable learning paths with tools for at-risk students
- Tracking data and reporting learning outcomes
- Calendar and announcement features

CAMPUSLEARNING HOSTING

Campus Management offers hosting services that enable institutions to outsource the necessary technical infrastructure and its ongoing maintenance and support to a team of skilled IT professionals who are experts in the installation and configuration of Moodle.

CampusLearning Hosting provides:

- 24/7 availability and maintenance
- SAS70 Type II certified control and security
- Continuous Full data backup to off-site vault
- SLA-based Disaster Recovery
- Improved scalability, performance, and 'green' using x64 blade server technology
- Application and operations expertise
- Enhanced systems support
- Optional environments available for testing and training
- Redundant network, power, and HVAC Infrastructure
- Hardened systems with firewall and IDS protection
- High Availability architecture on Server, SAN, Network platforms

ONE CAMPUS ECOSYSTEM

CampusLearning is part of Campus Management's family of One Campus Ecosystem™ platform—a unified, efficient platform for all academic and administrative services.

UNITE CAMPUSLEARNING AND YOUR STUDENT SYSTEM

Institutions uniting their administrative suite and moodle can rapidly achieve new levels of self-service. Combining CampusLearning with your CampusVue system will create a cohesive, user-friendly ecosystem—uniting like never before your administrative and academic services and workflows.

COMPREHENSIVE SUPPORT FOR MOODLE

CampusLearning offers enterprise-wide services and support for Moodle:

- Tier 1 hosting and managed services
- Implementation services
- Technical consulting
- Systems integration with CampusVue
- Platform migration to Moodle
- Moodle user training
- 24/7 student and administrator help desk

UNIQUE ADVANTAGES OF INTEGRATION

As a leader in the development and support of enterprise systems for Higher Education, Campus Management has pioneered special integration to Moodle using its award-winning suite of administrative and web applications, and its open, services oriented architecture.

- Seamless, single-sign on access via personalized CampusPortal pages
- Merged academic and account self-services features
- Class registration and payment
- Consolidation of student activity across Moodle and CampusVue, including scheduling, Satisfactory Academic Progress data and triggers, degree audit, e-Advising, and more

BARRIERS TO WIDESPREAD ADOPTION OF ONLINE LEARNING (PERCENTAGE AGREEING)

Students need more discipline to succeed in online courses	63.3%
Greater faculty time and effort required to teach online	31.9%
Lack of acceptance of online instruction by faculty	25.9%
Online education costs more to develop and deliver	23.5%
